

BENCHMARKING ASSESSMENT REPORT

**DESTINATION BENCHMARKING** 

**DESTINATION JÄRVSÖ** GÄVLE, SWEDEN

## REPORT DATE: 20 October 2023

Benchmarking Data Collection Period: 1 January 2021 – 31 December 2021

The planet deserves more than half measures

## OVERVIEW

This annual assessment of **Destination Järvsö** was undertaken against EarthCheck benchmarking indicators and checklists developed for EarthCheck and listed below. <sup>1</sup> They have been carefully selected to track performance in key areas of environmental and social performance impact. EarthCheck benchmarking provides an organisation a vehicle for sustainability reporting and is based on the premise of continual improvement. By undertaking a Benchmarking Assessment an organisation meets the requirements of annual benchmarking which includes the collection and submission of benchmarking data to EarthCheck for review and completion of the Benchmarking Assessment Report.<sup>2</sup>

		Indicator Measure (Benchmark)
1	Policy	Policy is produced and in place
2	Energy	Energy Consumption (GJ / Person Year) Green Power (Purchased Electricity) (%) <sup>3</sup> Greenhouse Gas Emissions (Scope 1 and Scope 2) (t CO <sub>2</sub> -e / Person Year) Greenhouse Gas Emissions Breakdown by Scope (t CO <sub>2</sub> -e / Person Year)
		Indirect Emissions (Scope 3) (t CO <sub>2</sub> -e / Person Year) Greenhouse Gas Emissions Scope 3 Breakdown (t CO <sub>2</sub> -e / Person Year)
3	Water	Potable Water Consumption (kL / Person Year) Recycled / Captured Water (%) <sup>3</sup>
4	Waste	Waste Sent to Landfill (m <sup>3</sup> / Person Year) Recycled / Reused / Composted Waste (%) <sup>3</sup> Waste Sent for Incineration (m <sup>3</sup> / Person Year) <sup>3</sup>
5	Sector Specific	Nitrous Oxides Produced (kg / Person Year / Hectare) Sulphur Dioxide Produced (kg / Person Year / Hectare) Particulate Matter Produced (kg / Person Year / Hectare) Water Samples Passed (%) Habitat Conservation Area (%) Green Space (%) Significant Site Maintenance Fund (%) Destination Safety – Homicide Rate (%)
		Destination Safety – Theft Rate (%) Destination Safety – Assault Rate (%) Socio-Economic Benefit – Unemployment Rate (%) Accredited Operations (%)
		Destination Safety – Assault Rate (%) Socio-Economic Benefit – Unemployment Rate (%)
6	Water Savings	Destination Safety – Assault Rate (%) Socio-Economic Benefit – Unemployment Rate (%) Accredited Operations (%)
6 7	Water Savings Waste Recycling	Destination Safety – Assault Rate (%) Socio-Economic Benefit – Unemployment Rate (%) Accredited Operations (%) Lead Agency Performance
		Destination Safety – Assault Rate (%) Socio-Economic Benefit – Unemployment Rate (%) Accredited Operations (%) Lead Agency Performance Water Savings Rating (Points)

10	Pesticides	Pesticide Products Rating (Points)		
		Optional Benchmarking Indicators		
11	Selected Indicators	Carbon Sequestration (%)		
11		Renewable Energy (%)		

<sup>1</sup> Refer to the EarthCheck Sector Benchmarking Indicator (SBI) document for more information. For frequently asked questions (FAQs) about benchmarking or specific help, please log on to 'My EarthCheck' and visit your EarthCheck Benchmarking software.

<sup>2</sup> To meet the requirements stipulated in the EarthCheck Company Standard organisations are required to collect and submit Benchmarking data against each of the Core Benchmarking Indicators by way of annual Benchmarking Assessment, and have in place a repeatable system for accurately recording Benchmarking data including a methodology for calculating the organisation's Activity Measure for each consecutive year.

As a standard policy, all EarthCheck indicators are continuously reviewed, along with the performance levels which operators have to achieve in order to meet the requirements of the Company Standard. This review takes into account "business-as-usual" changes in practices and equipment, and is used to update where appropriate Baseline and Best Practice levels.

<sup>3</sup> These indicators are for guidance only and do not affect the overall benchmarking evaluation.

<sup>4</sup> There may be a slight variation between total figures presented in the energy table and the data summary due to unit selection and data rounding.

EarthCheck® is a registered trademark of Earthcheck Pty Ltd.

## **DESTINATION PERFORMANCE BENCHMARKS**

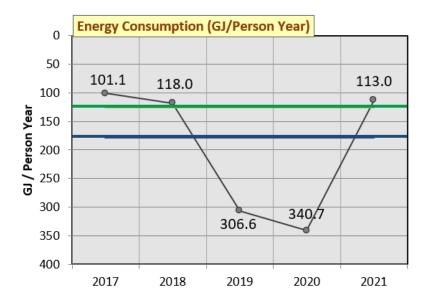

Current performance: Below

Below Baseline \* At or above Baseline ✓

At or above Best Practice ★

- 1. Policy ★
- 2. Energy

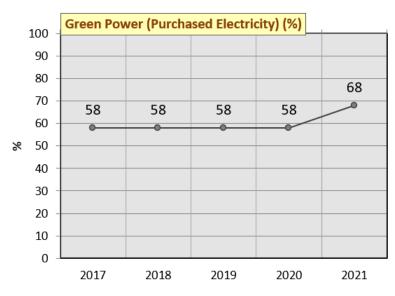

# Energy Consumption (GJ / Person Year) 🗡

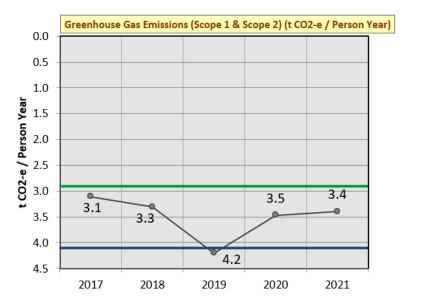

Energy Consumption (GJ / Person Year) for the year 2021 (1 January 2021 – 31 December 2021) was 113 GJ / Person Year, which was 8.5% better than the Best Practice level.

## Green Power (Purchased Electricity) (%)

Green Power (Purchased Electricity) (%) for the year 2021 (1 January 2021 – 31 December 2021) was 68.0%.

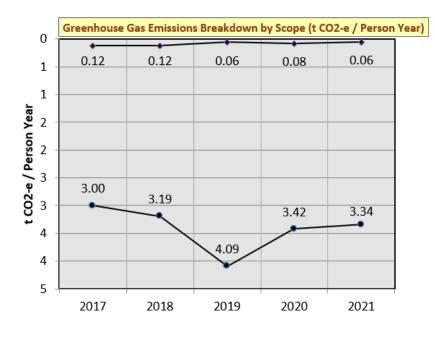

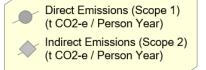

# Greenhouse Gas Emissions (Scope 1 and Scope 2) (t CO<sub>2</sub>-e / Person Year) $\checkmark$

Greenhouse Gas Emissions (Scope 1 and Scope 2) (t  $CO_2$ -e / Person Year) for the year 2021 (1 January 2021 – 31 December 2021) was 3.4 t  $CO_2$ -e / Person Year, which was 17.1% better than the Baseline level.

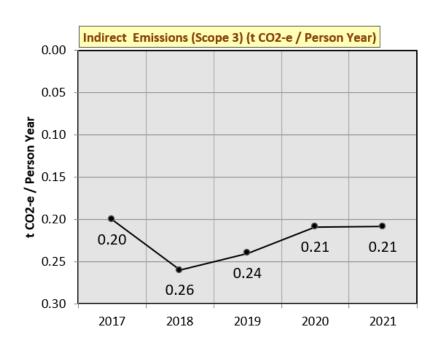

## Greenhouse Gas Emissions Breakdown by Scope (t CO<sub>2</sub>-e / Person Year)

Direct Emissions (Scope 1) (t  $CO_2$ -e / Person Year) for the year 2021 (1 January 2021 – 31 December 2021) was 3.34 t  $CO_2$ -e / Person Year.

Indirect Emissions (Scope 2) (t  $CO_2$ -e / Person Year) for the year 2021 (1 January 2021 – 31 December 2021) was 0.06 t  $CO_2$ -e / Person Year.

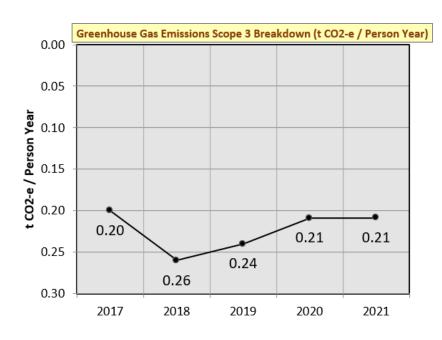

Indirect Emissions (Scope 3) (t CO<sub>2</sub>-e / Person Year)

Indirect Emissions (Scope 3) (t  $CO_2$ -e / Person Year) for the year 2021 (1 January 2021 – 31 December 2021) was 0.21 t  $CO_2$ -e / Person Year.

### Greenhouse Gas Emissions Scope 3 Breakdown (t CO<sub>2</sub>-e / Person Year)

Waste Indirect Emissions (Scope 3) (t CO2-e / Person Year)

Waste Indirect Emissions (Scope 3) (t  $CO_2$ -e / Person Year) for the year 2021 (1 January 2021 – 31 December 2021) was 0.21 t  $CO_2$ -e / Person Year.

## 3. Water

# Potable Water Consumption (kL / Person Year) ★

	Destination Järvsö
620.9 —	Baseline
434.6 —	Best Practice
	620.9 <b>—</b> 434.6 <b>—</b>

Potable Water Consumption (kL / Person Year) for the year 2021 (1 January 2021 - 31 December 2021) was 40.5 kL / Person Year, which was 90.6% better than the Best Practice level.

### 2021

Quantity	Unit	Potable Water Consumption (kL)
203,843	cubic metres	203,843.0 kL
	TOTAL	203,843.0 kL

### Recycled / Captured Water (%)

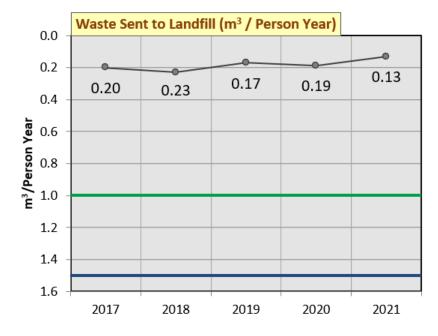

Recycled / Captured Water (%) for the year 2021 (1 January 2021 – 31 December 2021) was 0%.

## 4. Waste

## Waste Sent to Landfill (m<sup>3</sup> / Person Year) 🗡

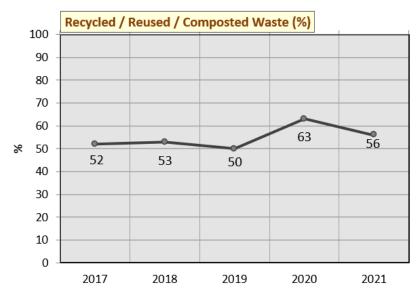

Waste Sent to Landfill (m<sup>3</sup> / Person Year) for the year 2021 (1 January 2021 – 31 December 2021) was  $0.13 \text{ m}^3$  / Person Year, which was 86.8% better than the Best Practice level.

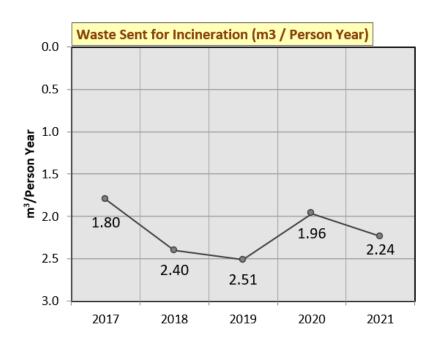

2021 Quantity	Unit	Type of Landfill	Type of Waste	Type of Operation	Waste Sent to Landfill (m <sup>3</sup> )
199,563	kilograms (uncompacted)	Covered and/or managed waste treatment facility	Unknown (mixed waste types)	Other Operation	665.21 m <sup>3</sup>
				TOTAL	665.21 m <sup>3</sup>

## Recycled / Reused / Composted Waste (%)

Recycled / Reused / Composted Waste (%) for the year 2021 (1 January 2021 – 31 December 2021) was 56.0%.

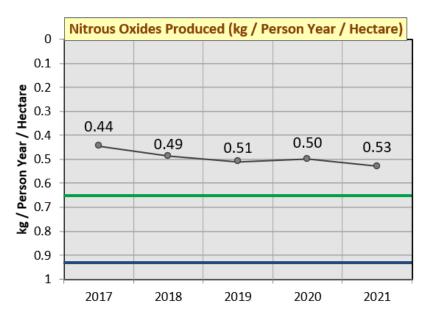

Waste Sent for Incineration  $(m^3 / Person Year)$  for the year 2021 (1 January 2021 – 31 December 2021) was 2.2  $m^3 / Person Year$ .

2021					
Quantity	Unit	Type of Incineration Technology	Type of Waste	Waste Sent for Incineration (m <sup>3</sup> )	
3,380,540	kilograms (uncompacted)	Continuous Incineration - Fluidised Bed	Textiles	11,268.5 m <sup>3</sup>	
			TOTAL	11,268.5 m <sup>3</sup>	

## Waste Sent for Incineration (m<sup>3</sup> / Person Year)

## 5. Sector Specific

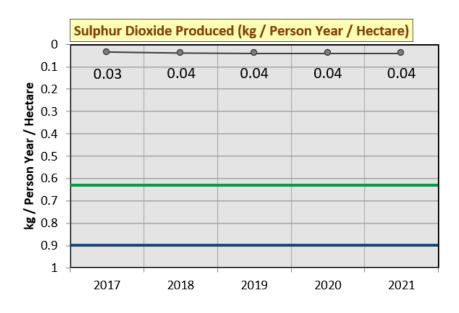

# Nitrous Oxides Produced (kg / Person Year / Hectare) 🗡

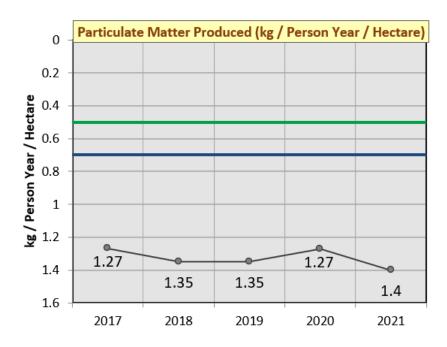

Nitrous Oxides Produced (kg / Person Year / Hectare) for the year 2021 (1 January 2021 – 31 December 2021) was 0.53 kg / Person Year / Hectare, which was 18.5% better than the Best Practice level.

# Sulphur Dioxide Produced (kg / Person Year / Hectare) 📩

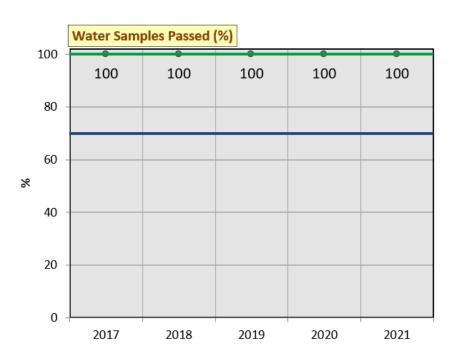

Sulphur Dioxide Produced (kg / Person Year / Hectare) for the year 2021 (1 January 2021 – 31 December 2021) was 0.04 kg / Person Year / Hectare, which was 93.7% better than the Best Practice level.

Particulate Matter Produced (kg / Person Year / Hectare) for the year 2021 (1 January 2021 – 31 December 2021) was 1.4 kg / Person Year / Hectare, which was 100% worse than the Baseline level.

## Water Samples Passed (%) 🗡

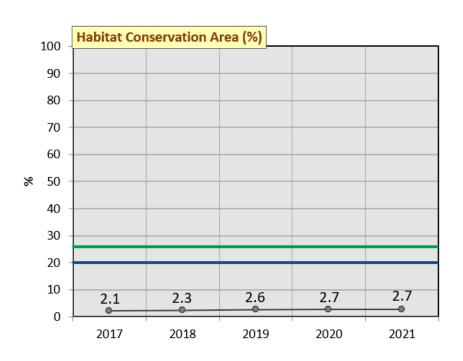

Water Samples Passed (%) for the year 2021 (1 January 2021 - 31 December 2021) was 100%, which was at the Best Practice level.

# Particulate Matter Produced (kg / Person Year / Hectare)

The planet deserves more than half measures

www.earthcheck.org

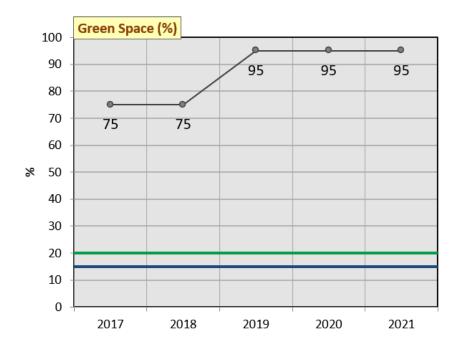

# Habitat Conservation Area (%)

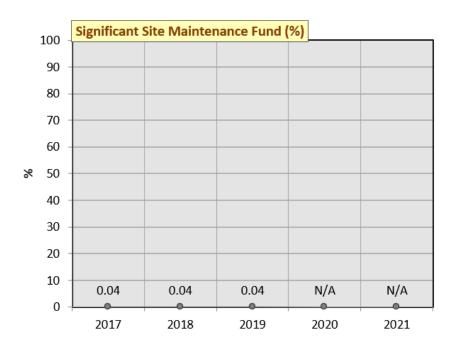

Habitat Conservation Area (%) for the year 2021 (1 January 2021 – 31 December 2021) was 2.7%, which was 17.3% below the Baseline level.

Green Space (%) ★

Destination Järvsö
15 - Baseline
20 - Best Practice

Green Space (%) for the year 2021 (1 January 2021 – 31 December 2021) was 95.0%, which was 75.0% better than the Best Practice level.

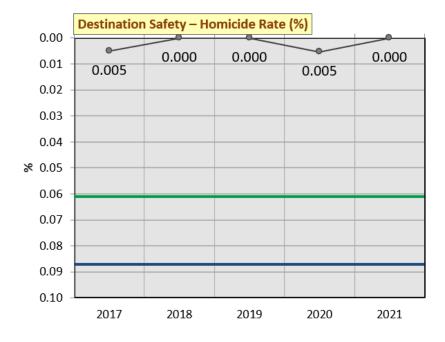

### Significant Site Maintenance Fund (%)

Significant Site Maintenance Fund (%) for the year 2021 (1 January 2021 – 31 December 2021) was not reported.

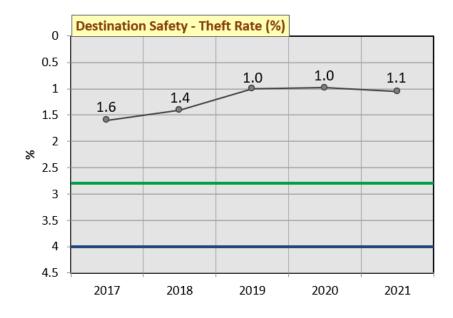

## Destination Safety – Homicide Rate (%) 🗡

Destination Safety – Homicide Rate (%) for the year 2021 (1 January 2021 – 31 December 2021) was 0.0%, which was 0.061% better than the Best Practice level.

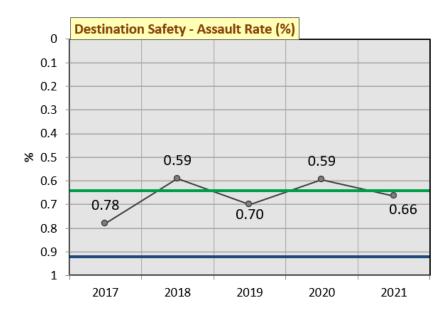

## Destination Safety – Theft Rate (%) 🖈

Destination Järvsö 4.0 – Baseline 2.8 – Best Practice

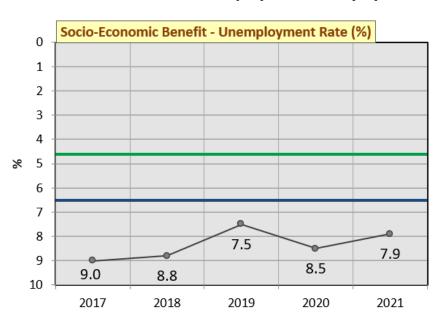

Destination Safety – Theft Rate (%) for the year 2021 (1 January 2021 – 31 December 2021) was 1.1%, which was 1.7% better than the Best Practice level.

## Destination Safety – Assault Rate (%) 🔨

Destination Safety – Assault Rate (%) for the year 2021 (1 January 2021 – 31 December 2021) was 0.66%, which was 0.26% better than the Baseline level.

# Socio-Economic Benefit – Unemployment Rate (%) 笨

Socio-Economic Benefit – Unemployment Rate (%) for the year 2021 (1 January 2021 – 31 December 2021) was 7.9%, which was 1.4% worse than the Baseline level.

## Accredited Operations (%)

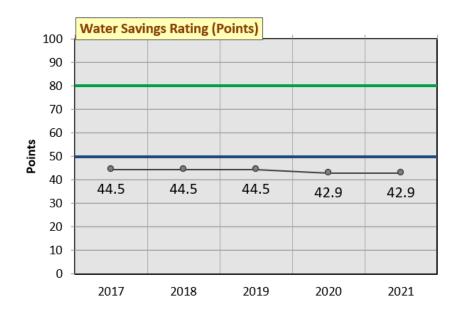

<ul> <li>Destination Järvsö</li> </ul>
5 — Baseline
6.5 - Best Practice

Accredited Operations (%) for the year 2021 (1 January 2021 – 31 December 2021) was 0%, which was 5.0% below the Baseline level.

# 6. Water Savings

## Water Savings Rating (Points) 笨

	.0	Destination Järvsö
50	—	Baseline
80	—	Best Practice

Water Savings Rating (Points) for the year 2021 (1 January 2021 – 31 December 2021) was 42.9 Points, which was 7.1 Points below the Baseline level.

Water Savings Measures	Frequency / Percentage Rating	Water Savings Rating (Points)
Check for leaks	Relevant / Not Available	50.0 Points
Low/dual flush toilets	Relevant / Not Available	50.0 Points
Low flow tap fittings	Relevant / Not Available	50.0 Points
Low flow shower fittings	Relevant / Not Available	50.0 Points
Water sprinklers used after dark	Relevant / Not Available	50.0 Points
Minimal irrigation landscaping	Relevant / Not Available	50.0 Points
Use of recycle/grey/rain water	0%	0.0 Points
	Overall Rating:	42.9 Points

# 7. Waste Recycling

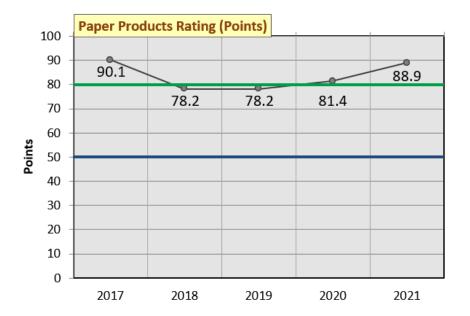

# Waste Recycling Rating (Points) ★

Waste Recycling Rating (Points) for the year 2021 (1 January 2021 – 31 December 2021) was 88.9 Points, which was 8.9 Points better than the Best Practice level.

Waste Recycling Measures	Frequency / Percentage Rating	Waste Recycling Rating (Points)
Glass	80-99%	88.9 Points
Paper/card	80-99%	88.9 Points
Iron & steel (ferrous metals)	80-99%	88.9 Points
Other metals (non-ferrous)	Not Relevant / Not Available	
Plastics	80-99%	88.9 Points
Rubber	Not Relevant / Not Available	
Green waste	80-99%	88.9 Points
	Overall Rating:	88.9 Points

# Paper Products Rating (Points) ★

Paper Products Rating (Points) for the year 2021 (1 January 2021 – 31 December 2021) was 88.9 Points, which was 8.9 Points better than the Best Practice level.

Paper Products Measures	Frequency / Percentage Rating	Paper Products Rating (Points)
Office paper	80-99%	88.9 Points
Serviettes	80-99%	88.9 Points
Tissues	Not Relevant / Not Available	
Toilet tissue	80-99%	88.9 Points
Paper towels	80-99%	88.9 Points
	Overall Rating:	88.9 Points

# 9. Cleaning

## Cleaning Products Rating (Points) ★

		Destination Järvsö	
50	_	Baseline	
80	_	Best Practice	

Cleaning Products Rating (Points) for the year 2021 (1 January 2021 – 31 December 2021) was 93.7 Points, which was 13.7 Points better than the Best Practice level.

Cleaning Products Measures	Frequency / Percentage Rating	Cleaning Products Rating (Points)
Hard floor cleaners	80-99%	88.9 Points
Carpet cleaners	100%	100.0 Points
Interior surface cleaners	80-99%	88.9 Points
External surface cleaners	Not Relevant / Not Available	100.0 Points
Glass cleaners	80-99%	88.9 Points
Detergents	80-99%	88.9 Points
Personal hygiene	100%	100.0 Points
	Overall Rating:	93.7 Points

## 10. Pesticides

## Pesticide Products Rating (Points) ★

Pesticide Products Rating (Points) for the year 2021 (1 January 2021 – 31 December 2021) was 100.0 Points, which was 20.0 Points better than the Best Practice level.

If your operation does not use any pesticide products (which is a positive outcome), a rating of 100 will be reported for this indicator on the basis that no use represents a Best Practice achievement.

Pesticide Products Measures	Frequency / Percentage Rating	Pesticide Products Rating (Points)
Weed killers	100%	100.0 Points
Fungal killers	Not Relevant / Available	100.0 Points
Rodent killers	Not Relevant / Available	100.0 Points
Insect killers	Not Relevant / Available	100.0 Points
	Overall Rating:	100.0 Points

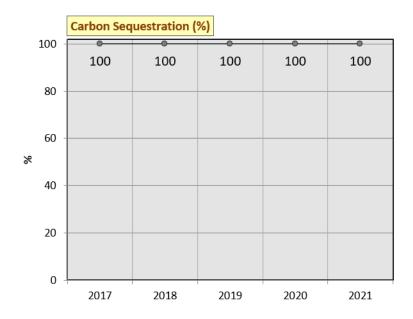

# **OPTIONAL BENCHMARKING INDICATORS**

**Destination Järvsö** has also nominated optional Operation Selected Indicators that they consider relevant to their specific operation and locality. The Operation Selected and Specified Indicator/s do not form part of the formal annual benchmarking exercise.

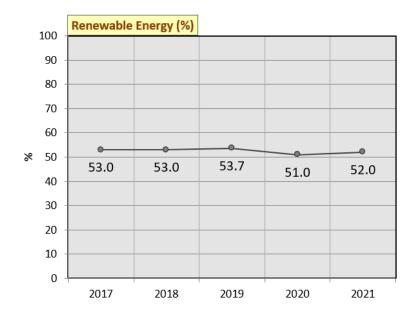

## 11. Selected Indicators

Selected Indicators are from a supplied list of EarthCheck indicators.

### **Carbon Sequestration**

## **Renewable Energy**

The supplied data has been compiled by **Destination Järvsö** in the prescribed manner, authorised by a senior executive of the company and submitted for an annual assessment.

## CONCLUSION AND RECOMMENDATIONS

Congratulations, **Destination Järvsö** has met the requirements to be recognised as an EarthCheck Benchmarked Community.

In addition to having a Sustainability Policy in place, ten of the assessed EarthCheck indicator(s) are at or above the Baseline level.

From the benchmarking data provided, thirteen indicator(s), *Energy Consumption, Potable Water Consumption, Waste Sent to Landfill, Nitrous Oxides Produced, Sulphur Dioxide Produced, Water Samples Passed, Green Space, Destination Safety – Homicide Rate, Destination Safety – Theft Rate, Waste Recycling Rating, Paper Products Rating, Cleaning Products Rating, and Pesticide Products Rating, are at or above the Best Practice level.* 

The five indicator(s) that fell below the Baseline level were *Particulate Matter Produced*, *Habitat Conservation Area, Socio-Economic Benefit – Unemployment Rate, Accredited Operations, and Water Savings Rating*.

The value for Water Saving was 7.1 Points below the Baseline level. **Destination Järvsö** is encouraged, therefore, to review current on-site water use and the possibility of increasing onsite recycling and reuse (e.g. using non-hazardous rain water and/or grey water for watering plants and washing exterior surfaces). **Destination Järvsö** is also encouraged to regularly check for possible leaks, and fitting (where appropriate) water saving devices such as low-flow shower heads and dual flush toilet cisterns.

The value for Habitat Conservation Area was 17.3% below the Baseline level. **Destination Järvsö** is encouraged to promote habitat conservation of land, wetlands and waterways to aid biodiversity conservation and support habitat protection within the region.

The value for Accredited Operations was 5% below the Baseline level. **Destination Järvsö** is encouraged to promote environmental accreditation to hotels, restaurants and other business within the destination.

**Destination Järvsö** is encouraged to continue to make improvements in the above indicator/s and to ensure that any indicator/s below baseline is addressed in the organisation's risk assessment and long term sustainability approach.

Improvements in all the EarthCheck indicators will not only help the environment, but can also help reduce operational costs. Due to the positive commitment that **Destination Järvsö** has demonstrated to the environment, the assessors are confident that they can maintain or improve performance, where appropriate and practical, in all indicators. In particular over the next 12 months, **Destination Järvsö** is encouraged to ensure that Water Savings Rating, Habitat Conservation Area, and Accredited Operations are at Baseline performance or better. In line with EarthCheck Policy this would enable **Destination Järvsö** to continue to meet the benchmarking requirements of the EarthCheck program.

Difference	8.9 Points better than the Best Practice level

#### Paper

#### Paper Products Rating (Points)

Supplied	88.9 Points
Calculated	88.9 Points
Baseline	50 Points
Best Practice	80 Points
Difference	8.9 Points better than the Best Practice level

### Cleaning

### **Cleaning Products Rating (Points)**

Supplied	93.7 Points
Calculated	93.7 Points
Baseline	50 Points
Best Practice	80 Points
Difference	13.7 Points better than the Best Practice level

### Pesticides

### Pesticide Products Rating (Points)

Supplied	100.0 Points
Calculated	100.0 Points
Baseline	50 Points
Best Practice	80 Points
Difference	20.0 Points better than the Best Practice level

## **Selected Indicators**

### Carbon Sequestration (%)

Supplied	100.0%
Calculated	100.0%

#### Renewable Energy (%)

Supplied	52.0%
Calculated	52.0%

# DETERMINATION OF BASELINE AND BEST PRACTICE LEVELS

#### General

The values for the Baseline and Best Practice levels for each indicator are derived from extensive worldwide research into available and appropriate case studies, industry surveys, engineering design handbooks, energy, water and waste audits, and climatic and geographic conditions.

National and regional data for per capita energy use, greenhouse gas and other emissions, wastes to landfill and water consumption, where available provide background data for normalisation of the expected performance values for per customer or employee, and/or overall performance of an enterprise being benchmarked. They are used to gauge the regional or national situation and environmental performances that an enterprise is based in, and hence what are reasonable levels to expect the enterprise to achieve.

A benchmarking result at, or above, the Baseline level demonstrates to all stakeholders that the enterprise is achieving above average performance. A result below the Baseline level indicates that an enterprise can and should carry out actions that will make beneficial improvements in performance.

#### **Consideration of Climate**

A major determinant of energy consumption in some sectors, primarily those centred on buildings such as accommodation, visitor centres and administration offices will be the dominant climatic conditions in which the enterprise is located. In general, to maintain the same level of indoor comfort, enterprises operating in hot or cold climates will consume more energy than those in temperate climates.

Similarly, it is recognised that in certain sectors a major determinant of potable water consumption will be the climate in which an enterprise is located, in particular those with large grounds and/or significant water-based facilities or activities. That is, enterprises located in hot climates are more likely to consume more potable water than equivalent ones located in cooler climates. Factors that are likely to lead to a higher level of potable water consumption, for example in the accommodation sector, include increased evaporation rates of swimming pools, personal bathing and irrigation demands of grounds. In consideration of this factor, Baseline and Best Practice levels can vary in relation to country location.

#### Waste Sent to Landfill

The benchmark indicator used for Waste Sent to Landfill is given in litres as waste bins are usually calibrated by volume, and it has been found that the majority of operations do not have access to the weight of material disposed of. However, if a weight is supplied, standard factors are used to convert from weight (e.g., kilograms (kg)) to volume (e.g., cubic metres (m<sup>3</sup>) or litres (L)). These are: 1 kg (uncompacted waste) = 0.00333333 m<sup>3</sup> or 3.33333 L and 1 kg (compacted waste) = 0.00153846 m<sup>3</sup> or 1.53846 L.

Operations should make note of the level of compaction when submitting data for assessment by EarthCheck.

#### **Review of Performance Levels**

The Baseline and Best Practice performance levels for EarthCheck indicators are continuously reviewed and are likely to change over time. This review by a team of international experts, takes into account "business-as-usual" changes in practices, equipment and facilities, as well as regulations and general improvement trends in performance and procedures. This review is used to update the levels of Baseline and Best Practice, and provides useful feedback to the user of the indicators.

The list below summarises the basic generic rules used to determine Baseline and Best Practice levels for EarthCheck indicators.

- If relevant enterprise sector specific case studies are not available for a type of activity in a designated region, then national averages will be used to ascertain the Baseline level. In this case, the Best Practice level will be set at a minimum of 30% better performance than the Baseline.
- If case study or national data are not available for a specific indicator, then the first enterprise that benchmarks will have its results set as 15% better than Baseline (i.e., half way between Baseline and Best Practice).
